

Loupedeck

Capture One Beta User Guide

What does Capture One Beta Integration actually mean?

Currently Loupedeck+ works using keyboard shortcuts where all our other integrations work via the internal support (SDK / API) made by the software manufacturer.

Unfortunately using keyboard shortcuts is not completely seamless. For example, changing exposure from 0,1 to 0,7 appears as six separate keyboard shortcut commands on the history instead of just one “exposure +0,6” -notification.

Why even publish a Beta version?

We have had far more requests from customers for Capture One integration than for any other software.

Releasing Beta software gives us valuable experience of how Capture 1 users work and from their feedback we can release improved versions of the software sooner.

All your feedback is welcome, please send via our Customer Support Form at the bottom of that page at <https://loupedeck.com/support/>

How do I activate Loupedeck with Capture One?

For Loupedeck+ to work you need to select the correct keyboard shortcut file from Capture One.

- Open Edit -menu within Capture 1
- Click on “Keyboard Shortcuts” (at the bottom of the menu list).
- Change “Capture One Default” or “Capture One 3.7 Default” to “Loupedeck”.

We have had a small number of MAC users unable to select the shortcut file, this is caused when the User Permissions for the Capture 1 shortcut folder are restricted, normally at an Admin level.

To solve this issue: -

- Via Navigator select the folder
 - o /Users/"username"/Library/ApplicationSupport/Capture One/KeyboardShortcuts
- This folder needs to be set to give Read & Write access for that “user name”. These are changed by right clicking the folder and choosing (Get Info)
- If “Library” is hidden folder press (Command+Shift+.) to access

FUNCTIONS	BUTTON / DIAL / SCROLLING WHEEL	DESCRIPTION
Selecting	Copy	After editing, press Copy once to copy the adjustments (edits) of that photo to the clipboard
	Paste	Press Paste once to paste the earlier copied adjustments to the current photo
	FN+Copy FN+Paste	<p>Press FN+Copy to make a virtual copy of the selected photo's edited version</p> <p>Press FN+Paste to make a virtual copy of the selected photo's original version</p>
	Rating/Color	<p>Pressing Rating/Color toggles between the ratings and color labels.</p> <p>The default filter mode is ratings</p>
	<p>1 / red 2 / yellow 3 / green 4 / blue 5 / purple</p> <p>C1</p> <p>Rating/Color SHIFT CTRL ⌘</p>	<p>Rating/Color mode:</p> <p>Press a button once to set a rating or a color label to a photo. Press the button again to remove the rating or the color label. Press FN+rating/color button to filter the photos in the filmstrip that have that specific or higher rating or a specific color.</p> <p>As a default press C1 to reset image rating/color.</p> <p>Keyboard Modifier mode:</p> <p>Press FN+Rating/Color to activate <i>Keyboard modifier</i> mode. When Keyboard Modifiers are active, rating buttons will work as normal keyboard modifiers.</p> <p>Press FN+Rating/Color again to deactivate <i>Keyboard Modifier</i> -mode and return to Rating/Color -mode.</p> <p>Esc Shift</p>

	ALT TAB FN+SHIFT FN+CTRL FN+TAB	Control Command (MacOS) or Windows key (Win) Alt (Win) or Option (MacOS) Tab(ulator) Enter Backspace Space
Navigating	Arrows	Navigating between images Press the left or right arrow to move to the previous or next thumbnail in the filmstrip.

Colors and lighting

FUNCTIONS	BUTTON / DIAL / SCROLLING WHEEL	WHAT CAN YOU DO WITH IT?
Color management	White balance Tint Vibrance Saturation	Rotate the dial to set a value.
	Hue Sat Lum	Hue (Highlights), Sat (Midtones) or Lum (Shadows) selects which of the 3-way luminance sections are adjusted using the Color Balance tool
	Red wheel Orange wheel Yellow wheel	Use scrolling wheels alongside with Hue , Sat and Lum -buttons. Use Red scrolling wheel to adjust the saturation of current luminance section (high, mid, shadow). Use Orange scrolling wheel to adjust the Hue of that current luminance section (high, mid, shadow). Use Yellow scrolling wheel to adjust the amount of luminance in that current luminance sector (high, mid, shadow).

Lighting and contrast adjustments	Exposure Shadows Highlights Blacks Whites Contrast Clarity	Rotate Exposure to adjust exposure Rotate Shadows to adjust HDR Shadow Rotate Highlights to adjust HDR Highlight Rotate Blacks to adjust levels black point Rotate Whites to adjust brightness Rotate Contrast to adjust contrast Rotate Clarity to adjust clarity
Levels tool	FN+Blacks FN+Exposure FN+Whites FN+Shadows FN+Highlights	Rotate FN+Blacks to set black point Rotate FN+Exposure to set midtone point Rotate FN+Whites to set high point Rotate FN+Shadows to set black target Rotate FN+Highlight to set highlight target

Personalized functions

FUNCTIONS	BUTTON / DIAL / SCROLLING WHEEL	WHAT CAN YOU DO WITH IT?
Personalized functions	D1 & D2	<p>D1 and D2 are customizable dials. Pressing Fn button in conjunction with a dial accesses a second function for that dial</p> <p>Rotate the dial to set a value. By default, D1 is grouped with contrast and exposure dials. It changes structure (D1) and vignetting (FN+D1).</p> <p>By default, D2 is set for adjusting image details and changes sharpening amount (D2) and noise reduction's luminance amount (FN+D2).</p>
	Control Dial	<p>Control Dial controls multiple different functions in editing software modules and specified editing tools such as the brush and crop tools.</p> <p>Default settings can be assigned separately for Library and Develop modules via the Loupedeck Configuration Software.</p>

	<p>Turn Control Dial to scroll through images up or down. FN+Control Dial to move from left to right.</p> <p>Press Control Dial to activate crop tool. Turn Control Dial to rotate Image. Apply changes and exit tool by pressing Control Dial again.</p>
<p>L1 – L3, C1 – C6</p> <p>L-buttons</p> <p>C-Buttons</p>	<p>L1 to L3 and C1 to C6 are customizable buttons.</p> <p>Press the button once to activate the selected function. Press again to apply and exit the tool.</p> <p>Pressing Fn button in conjunction with a Customizable Button accesses a second function for that dial</p> <p>.</p> <p>Press L1 to draw a mask (brush) Press L2 to apply gradient mask Press L3 to enter crop tool Press FN+L1 to enter spot removal tool Press FN+L2 to use erase mask tool Press FN+L3 to activate Loupedeck setup.</p> <p>Press C1 to clear a rating/color (select mode) Press C2 to clear a color tag (only color)</p> <p>Press C3 to show mask Press C4 to show exposure warning</p> <p>Press C5 to Zoom in Press C6 to Zoom out</p> <p>Press FN+C2 to pick white balance</p> <p>Press FN+C5 Rotation straighten Press FN+C6 Key Stone</p>

	P1 – P8	P1-P8 are not supported by beta release
--	---------	---

Advanced functions

FUNCTIONS	BUTTON / DIAL / SCROLLING WHEEL	WHAT CAN YOU DO WITH IT?
Basics	Undo	<p>Press Undo once to undo the last edit in your workflow.</p> <p>Press Undo multiple times to go backwards in your workflow.</p> <p>Press Fn+Undo to reset the photo.</p>
	Redo	Press Redo once to redo an edit after undo.
	Crop tool Mask tool Radial filter Graduated filter Spot Removal tool	<p>Tools offer a more versatile way to edit your images: Instead of affecting global level (the overall image), these tools affect only the part of the image they have been applied to (local level).</p> <p>Tools are (by default) assigned to L1-L3. Tools can be assigned to all customizable L- and C-buttons. Using an assigned tool button together with FN pressed you can access a second layer of tools.</p> <p>When tool is activated pressing tool button again will apply the changes and exit the tool. If you want to undo the changes, press undo.</p> <p>Use Control Dial to adjust mask tool tip size.</p>
	Screen Mode	Not supported on Beta Release.
	Before/After	Not supported on Beta Release.

	Export	<p>Export opens the export dialog for images.</p> <p>A new dialogue box will open each time the Export button is pressed, allowing the opening of multiple dialogues.</p>
	Fn	<p>Fn activates secondary controls in Loupedeck.</p> <p>If editing software is not active, pressing Fn brings editing software to foreground.</p>
